

Server PT: End Devices

AP-PT: Wireless Devices

Old Car: Smart City

Fire Sprinkler: Industrial (to convert Fire Sprinkler to wireless-> config->advanced->

IO config (PT-IOT-NM-1W))

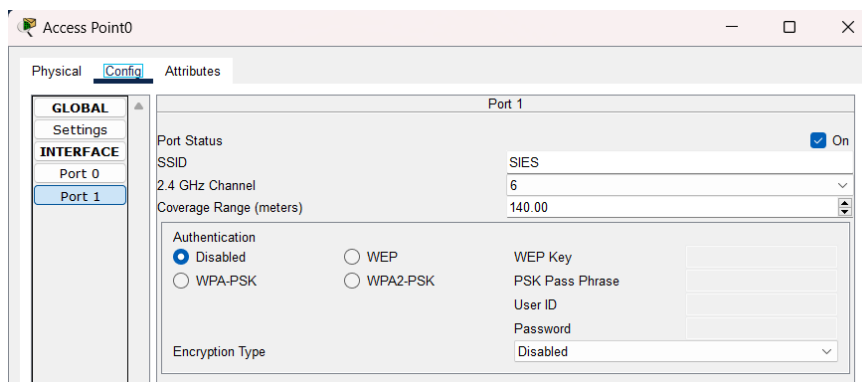

Lawn Sprinkler: Home

Smoke Detector: Home

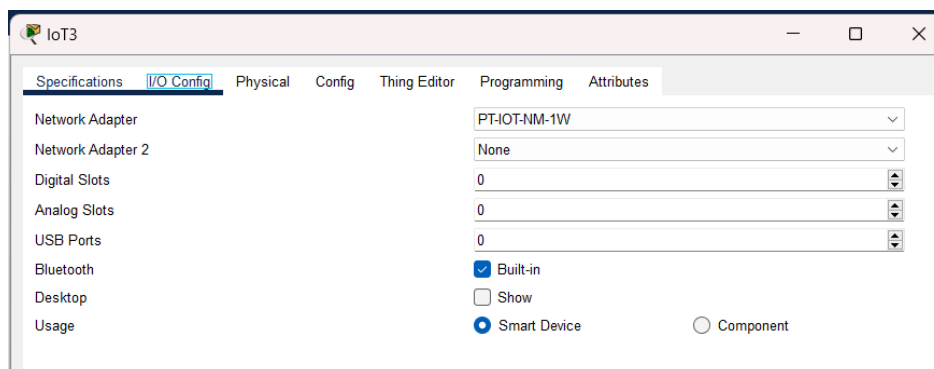

Prac 3 A: (Using Remote Server)

-Connect server and access point.

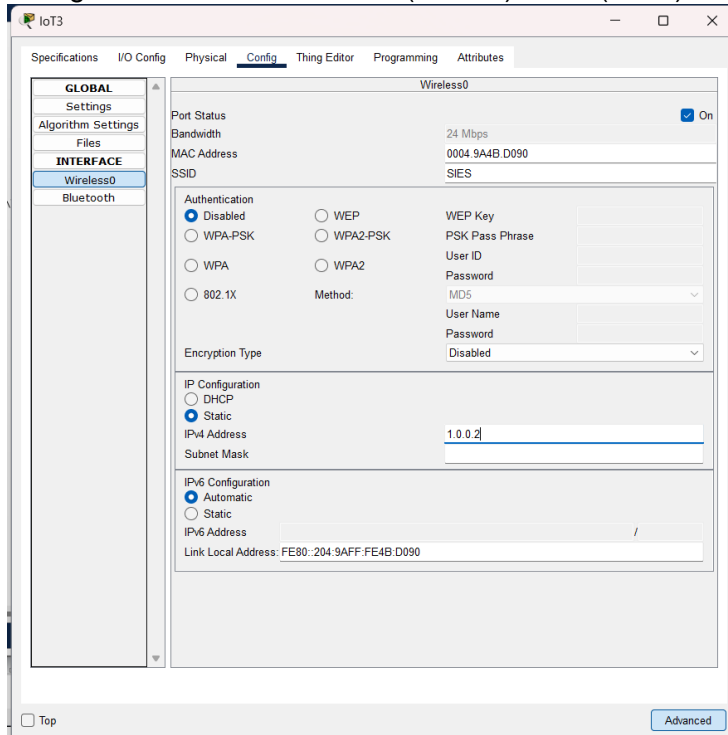

AP-PT: Port 0 [auto] Port 1 [SSID(SIES)]

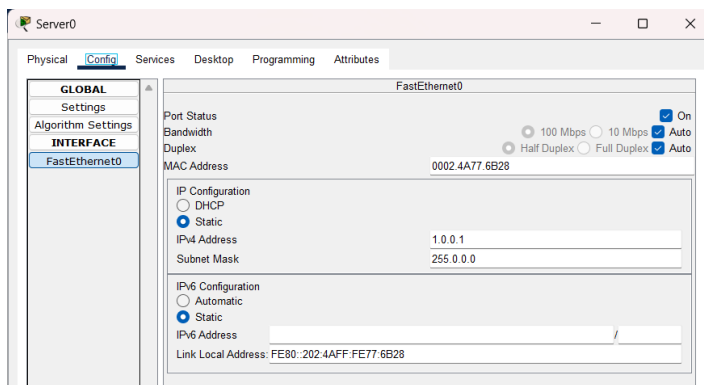

Smoke Detector: Advanced Config->IO config->Network Adapter (PT-IOT-NM-1W) [check]

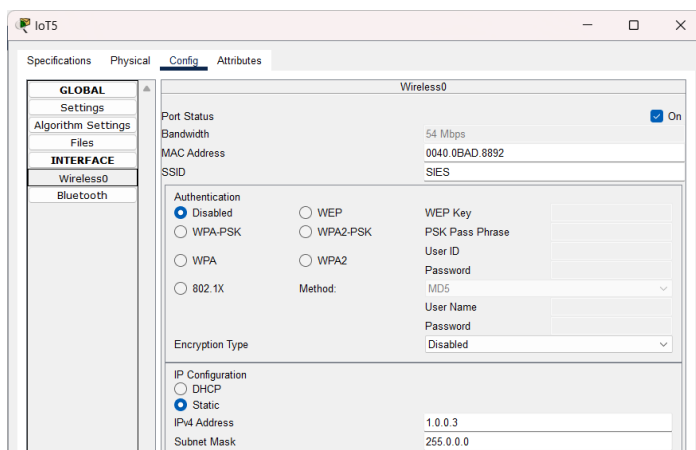

config->wireless->static->IPV4(1.0.0.2) SSID(SIES)

Server PT: Config->IP config->IPV4 (1.0.0.1)

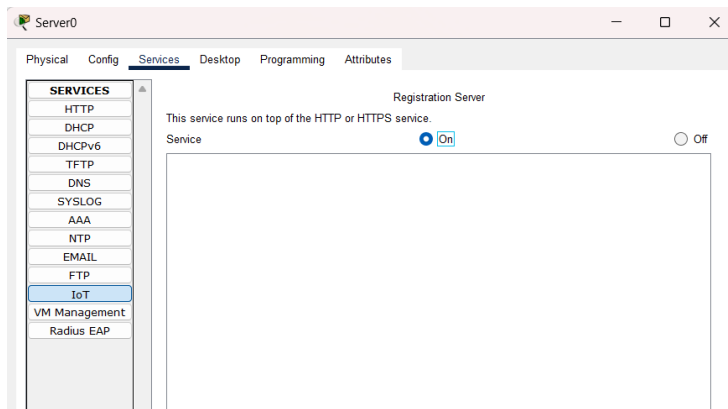

Lawn Sprinkler: config->wireless->static->IPV4(1.0.0.3)

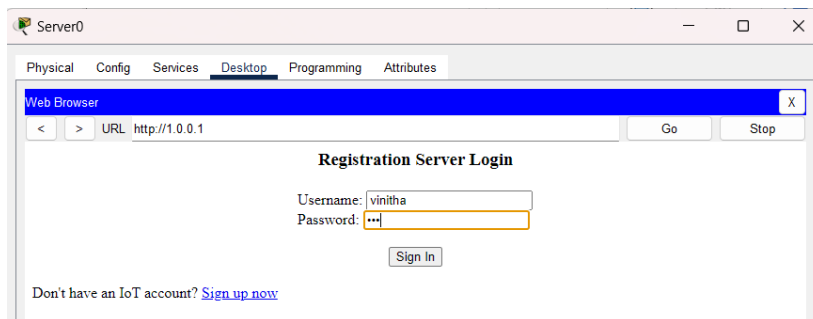

To send to server: (registering the sensor to server)

Services->IoT->ON

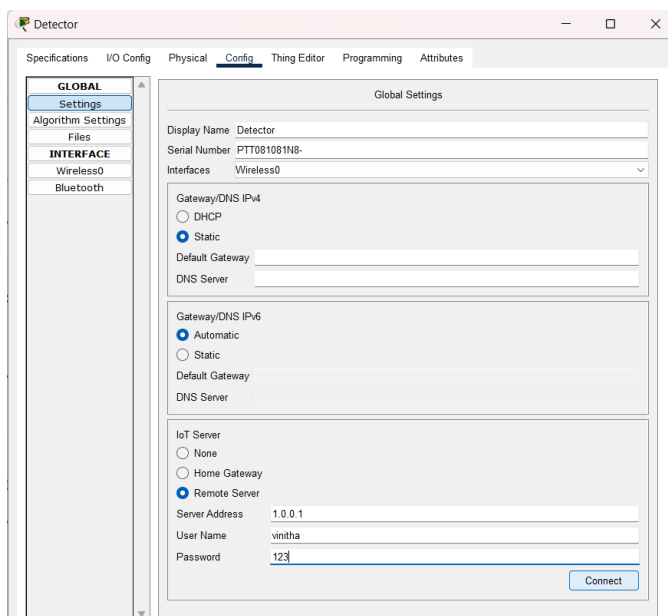

Desktop->Web Browser->1.0.0.1 Signup-> username: viniha Password:123

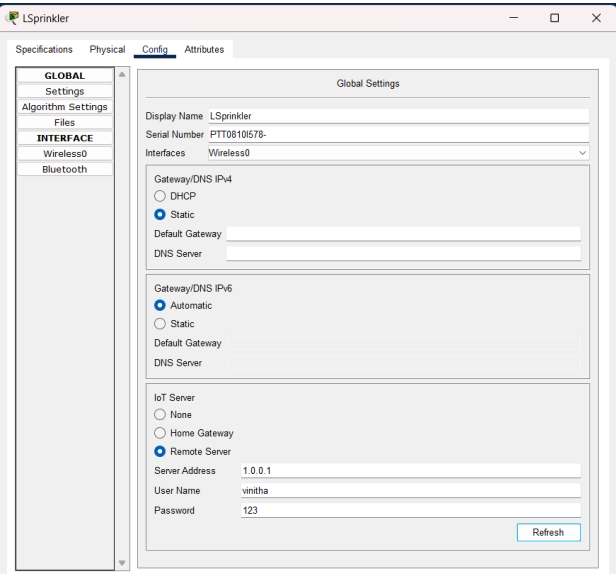

URL->Conditions->Add

Smoke Detector->config->settings->IoT server -> Remote Server -> Server address:1.0.0.1 (viniha|123)->connect [change name(Detector)]

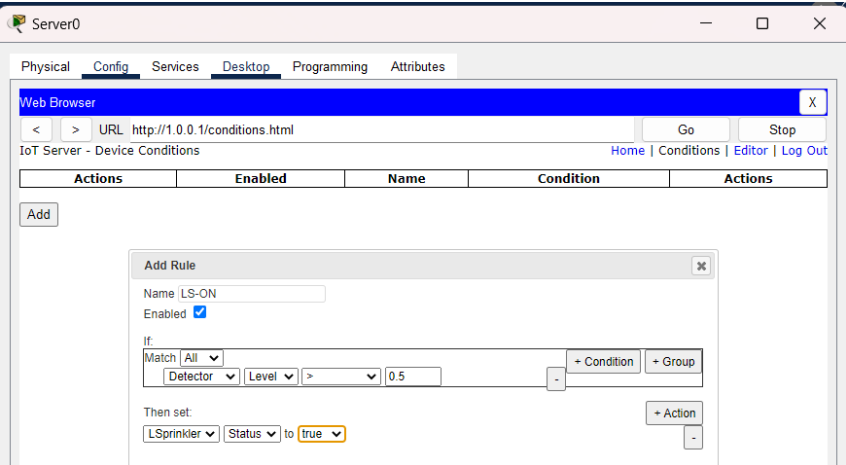

Same for sprinkler

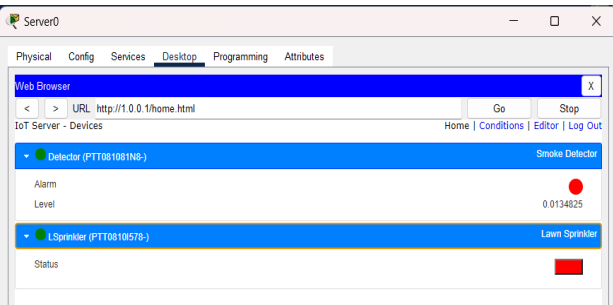

Car[start]->Alt+ left click

Server->URL->Conditions->Add

| Actions |        | Enabled | Name   | Condition            | Actions                        |
|---------|--------|---------|--------|----------------------|--------------------------------|
| Edit    | Remove | Yes     | LS-ON  | Detector Level > 0.5 | Set LSprinkler Status to true  |
| Edit    | Remove | Yes     | LS-OFF | Detector Level < 0.5 | Set LSprinkler Status to false |

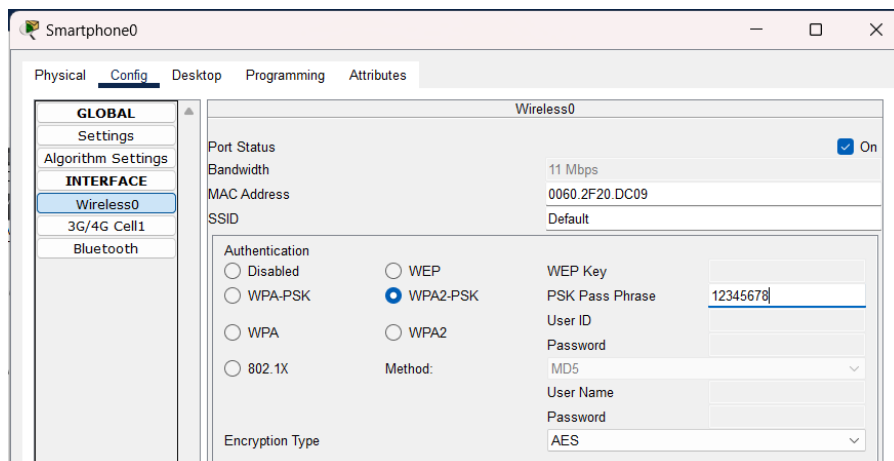

Prac 3 B: (Using Home Gateway)

Water Level Monitor: Home

Home gateway: Network Devices-> Access Points

Smart Phone: End Devices

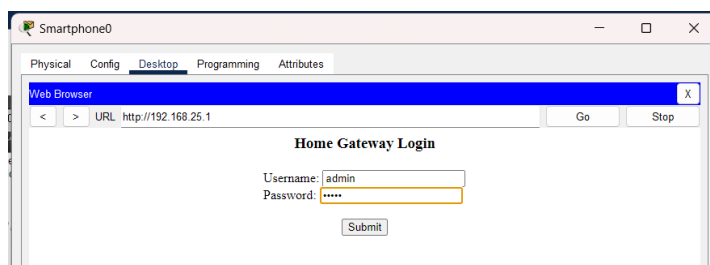

Smart Phone->config->wireless->Authentication(WPA2-PSK[12345678])

Same for every element->config->wireless->Authentication(WPA2-PSK[12345678])

Home Gateway & Smart Phone & Water Monitor & Sprinklers->SSID(SIES1)

SmartPhone->Web browser->192.168.25.1->username: admin | password: admin

Register Devices:

All devices sprinkler and Monitors ->config ->settings->IOT server->(Home Gateway)

| Actions |        | Enabled | Name    | Condition                 | Actions                  |
|---------|--------|---------|---------|---------------------------|--------------------------|
| Edit    | Remove | Yes     | LS1-ON  | WL1 Water Level <= 5.0 cm | Set LS-1 Status to true  |
| Edit    | Remove | Yes     | LS1-OFF | WL1 Water Level >= 5.0 cm | Set LS-1 Status to false |
| Edit    | Remove | Yes     | LS2-ON  | WL2 Water Level <= 5.0 cm | Set LS-2 Status to true  |
| Edit    | Remove | Yes     | LS2-OFF | WL2 Water Level >= 5.0 cm | Set LS-2 Status to false |

Make status of LS1 and LS2 True first by clicking the red button on IOT devices

Prac 4 A: RIP Protocol:

Router PT: Network Devices

Switch PT: Network Devices

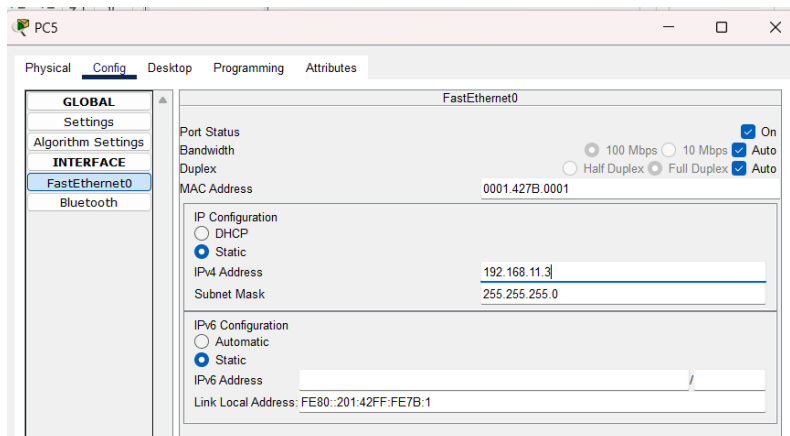

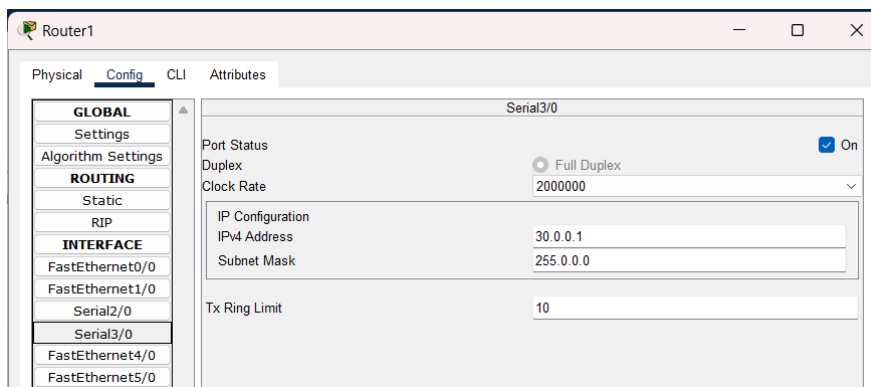

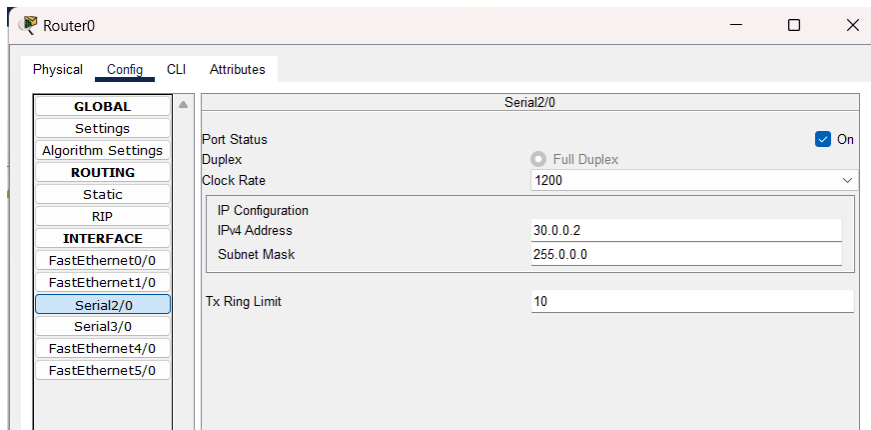

PC PT: End Devices

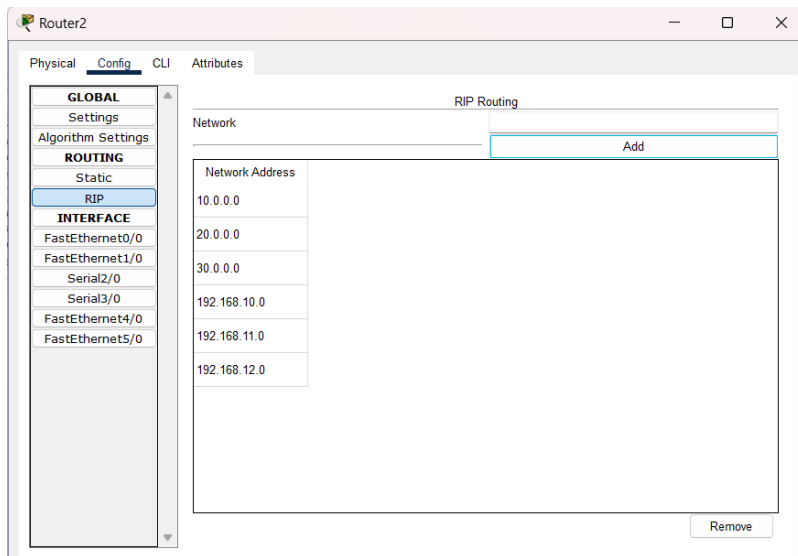

Prac 4 B: OSPF Protocol

Configure PC-> Gateway (eg. 192.168.12.1) and IPV4 addresses (eg. 192.168.12.2-3)

Connect routers as well by using the same IP for a particular wire (eg. 10.0.0.1)

Keep active router wire ON

## Send Packets
